Our services

Your supply chain solution

Punctual delivery of parcels and pallet shipments in excellent quality is our job, but we can do even more:

EXPRESS

Fast shipping with a delivery time of less than 24 hours and over ten different express services.

ACTIVE TEMPERATURE CONTROL

Nationwide and sustainable conscious transport in the range of 2–8 °C and 15–25 °C.

HIGHEST SECURITY

Professional handling of goods, including the use of special sorting equipment and temperature-controlled halls.

TRANSPARENT AND SECURE PROCESSES

Digital tracking with a constant overview of the status and detailed temperature curves.

COMBINED SHIPPING

Flexible shipping of parcels and pallets together in one shipment.

Fast. Secure. trans-o-flex.

For everything that needs to arrive safely and quickly

For over 50 years, trans-o-flex offers its customers customised and comprehensive logistics solutions for demanding industries.

With different express services and actively temperature-controlled networks (2–8 °C and 15–25 °C), we achieve a standard delivery time within the next working day - for fast and secure deliveries. Our system enables end-to-end processing of the entire logistics chain - from collection, storage, packaging and serialisation through to on-time delivery. For time-critical consignments without reloading, our direct and charter journeys offer particularly fast and efficient delivery - directly to the recipient.

In addition, with our Special Services, we develop individual logistics solutions for highly complex or specialised requirements that go beyond standard logistics solutions.

With the global network of trans-o-flex and GEODIS, you benefit from solutions in Supply Chain Optimisation, Freight Forwarding, Contract Logistics, Distribution & Express, Road Transport and Airfreight for your international expansion.

Global. Solution-orientated. Connected.
