Our services

Your supply chain solution

From procurement to fulfilment, we offer a broad portfolio: Express shipping (national/international), temperature-controlled transport (2–8 °C/15–25 °C), storage and commissioning.

EXPRESS

Fast shipping with delivery times of less than 24 hours and more than ten different express services.

ACTIVE TEMPERATURE CONTROL

Nationwide and sustainable conscious transport in the range of 2–8 °C and 15–25 °C.

HIGHEST SECURITY

Professional handling of goods, including the use of specialised sorting equipment and temperature-controlled facilities.

TRANSPARENT AND SECURE PROCESSES

Digital tracking with a constant overview of the status and detailed temperature curves.

HAZARDOUS GOODS COMPETENCE

Secure transport of sensitive and high-value goods of all dangerous goods classes (except class 1).

2C SERVICES

Flexible and easy shipping, taking into account special requirements for delivery to home patients.

COMPLETE LOGISTICS

Efficient and customised solutions for every step of the supply chain – from collection to on-time delivery.

Fast. Secure. trans-o-flex.

For everything that needs to arrive safely and quickly

For over 50 years, trans-o-flex offers its customers customised and comprehensive logistics solutions for demanding industries.

With over ten different express services and actively temperature-controlled networks (2–8 °C and 15–25 °C), we achieve a standard delivery time within the next working day - for fast and secure deliveries. Our system enables end-to-end processing of the entire logistics chain - from collection, storage, packaging and serialisation through to on-time delivery. For time-critical consignments without reloading, our direct and charter journeys offer particularly fast and efficient delivery - directly to the recipient.

In addition, with our Special Services, we develop individual logistics solutions for highly complex or specialised requirements that go beyond standard logistics solutions.

With the global network of trans-o-flex and GEODIS, you benefit from solutions in Supply Chain Optimisation, Freight Forwarding, Contract Logistics, Distribution & Express, Road Transport and Airfreight for your international expansion.

Global. Solution-orientated. Connected.

ESG

Sustainable logistics

For solutions that work today and protect tomorrow

The logistics of sensitive goods, especially for the pharmaceutical industry, is a matter of great importance to trans-o-flex, which is implemented reliably and carefully. However, our responsibility goes far beyond mere transport: for us, sustainability is a fundamental pillar that holistically combines economic activity with the interests of our employees, the environment and society.

Our ESG strategy, firmly anchored in our company and aligned with the UN Sustain-

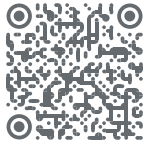

able Development Goals, is manifested in our commitment to environmental protection, for example through emissions reduction and the use of 100% green electricity for a climate-neutral supply chain.

We live this responsibility every day, for logistics that not only moves goods but also protects a sustainable future.

Secure. Efficient. Responsible.

Circular packaging

Services for return & reusable systems

PACKAGING RETURN (VPR)

We collect the empty packaging from your customer and deliver it to an address specified by you. The packaging is handed over to our drivers during their next delivery round.

SERVICE OVERVIEW

- Collection of your empty packaging
- Delivery to your desired address

Advantages

- Reuse of your own packaging
- Minimisation of your customer's disposal costs
- Simple administration
- Can be combined with other services

REUSABLE SYSTEMS

Replace your packaging with customised reusable concepts – economically sensible, ecologically sustainable.

SERVICE OVERVIEW

- Transport in reusable containers
- Collection, sorting and palletising of containers
- Return in accordance with reusable system and agreements
- Ensuring the flow of information in accordance with system and agreements

Advantages

- Centralised coordination of transport and return
- One partner for reusable systems from different system providers
- Reduction in your packaging costs
- Environmental friendliness

ENVIRONMENT

Purpose-driven logistics *Sustainable solutions for today, tomorrow and the next generation*

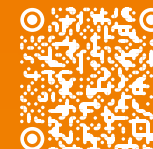

We don't just deliver parcels. We transport sensitive goods, especially medicines, with precision and passion. But our responsibility goes further: we think not only about safe transport, but also about our planet and a sustainable future.

- Safe & reliable: Every shipment handled with the utmost care.
- Climate targets for 2045: On the path to CO2e neutrality.
- 100% green electricity: Clean energy for our locations.
- Conserving resources: Through reusable systems and recycling.
- Smart logistics: Efficient routes for fewer emissions.
- Holistic sustainability: Our ESG strategy in every detail.
- For us, sustainability is not a trend, but our promise. For a world that we move and protect together.

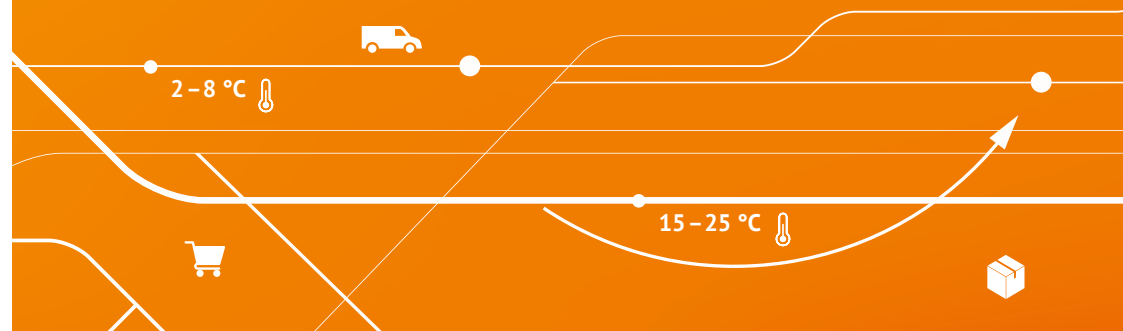

People drive logistics *That is why we invest in fairness, respect and sustainable growth*

Our employees are at the heart of our success. We firmly believe that sustainable logistics can only be achieved together with respect, trust and equal opportunities for all.

GROWING TOGETHER

- Developing talent: We invest in the continued development of each individual, thereby securing our future.
- Health & safety: The health and safety of our teams is our top priority, always. Diversity strengthens us.
- We celebrate different backgrounds and ideas, recognising them as drivers of innovation.
- Living community: Beyond our logistics we are actively committed to society.
- Acting on values: Integrity and ethical behaviour are at the heart of everything we do.
- We are not just a logistics provider — we are a reliable partner, steering the future with integrity and responsibility.

GOVERNANCE

Sustainable management

Based on values and partnership

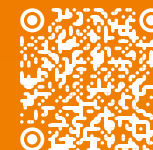

Responsible corporate management is the foundation for everything we do. We bear a special responsibility, particularly in the healthcare sector where the principle of prevention rather than reaction applies.

- We build trust through transparency and clear structures. This is our promise to you and our partners.
- Code of Conduct: Our compass for ethical, social and legally correct behaviour.
- Supplier Code: We ensure that our partners also share our values.
- ESG Strategy: We prioritise sustainability in every area of our business.
- Quality and safety: The trans-o-flex temperature alarm protects sensitive goods
- International standards: We are guided by the ILO and the UN Global Compact and more.
- As part of GEODIS, we are involved in the sustainability assessment by EcoVadis.
- We see ourselves not just as a logistics provider, but as a strong community.

Move better together

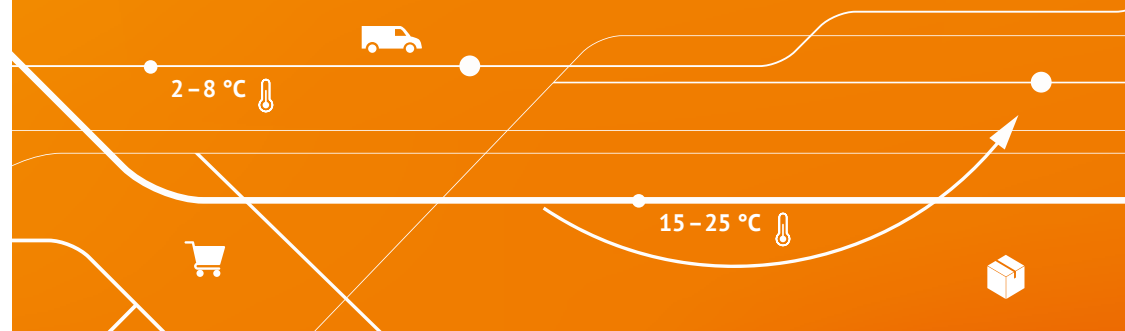

We take responsibility through social engagement, educational projects and environmental initiatives.

Our commitment goes beyond logistics, because we take responsibility for the people and the world around us.

GROWING TOGETHER

- Leaving a green footprint: Promoting nature through tree-planting campaigns and planting flowers on company grounds.
- Creating opportunities: We support young talent and promote entry into professional life.
- Strengthening the community: Our volunteer days and fundraising campaigns provide assistance where it matters most.
- Education and inspiration: From reading days to Girls'/Boys' Days, we inspire the next generation.
- Secure logistics: Our smart temperature alarm protects goods and demonstrates our sense of responsibility.

**Low carbon production (Scope 1 & 2,
target: 42% reduction until 2030)**

**Occupational safety (LTIFR = Lost Time
Injury Frequency Rate = 3,9)**

**Low carbon supply chain
(Scope 3, target: 25% intensity reduction until 2030)**

**100% electricity from
renewable energy sources**

LED-quota (52%, target: 100% until 2030)
