

SERVICES PART 5

# Sustainability

## Looking ahead to the Future

Whether ointment or painkiller, vaccine or cancer drug: At trans-o-flex, the transport of pharmaceuticals, medical goods and technical equipment of the pharmaceutical industry is a passion. Our logistics help to alleviate pain and fight disease. In addition to medicines, trans-o-flex uses its express networks to transport many other high-quality and sensitive goods that must reach their destination just as quickly, but above all just as reliably and undamaged. Careful handling of all goods entrusted to us is a top priority for trans-o-flex. This attitude applies not only to goods. The company has consciously committed itself to respectful, sensitive and responsible treatment of employees, customers, suppliers and goods. This also applies to the resources we consume. We are proud of this and are happy to show how we live this responsibility.

# Services

## Returnable transit packaging (RTP)

We collect the empty packaging from your customer and deliver it to an address you specify. The packaging is handed over to our drivers in the course of the next delivery.

- Take your empty packaging with you
- Delivery to the address of your choice

### BENEFITS:

- Re-use of your own packaging
- Minimisation of your customer's disposal costs
- Simple administration
- Environmentally friendly service
- Can be combined with other services

## Your sustainable partner

At trans-o-flex, environmental protection is part of a comprehensive sustainability strategy based on three equally important aspects for our future viability: ecological, economic and social.

As a transport company, we are aware of the challenges involved and know that it is in our own interest to lay the foundations of our business tomorrow with our actions today. Continuously improving environmental compatibility is therefore an integral part of all our services.
